CHIP4 AND CLP WORKSHOP

CHIP4

The Chemical (Hazard Information and Packaging for Supply) Regulations 2009 (SI 2009 No 716) (CHIP4) were made and came into force in April and are scheduled to remain applicable beyond mid 2015. Are you sure you understand the implications? What has happened to

- the L142 Approved Supply List (ASL)?
- the L131 Approved Classification and Labelling Guide (ACLG)
- the L130 ACOP & Guidance: The compilation of safety data sheets?

What significant twists did these changes introduce, and what are the implications for industry of the remaking of most of the CHIP3 former requirements for classification and labelling? For instance

- is “white spirit” still a valid substance name? If not what are the consequences for SDSs and labelling for mixtures?
- have any other changes happened? and how will you hear of them?

Then what about the changes to special extra labelling rules, consequent on REACH taking over, from 1.6.2009, the provisions formerly in the 76/769/EEC Restrictions on Marketing and Use Directive (RMUD), and implemented in various former GB Regulations; and from the revocation of Notification of New Substances Regulations 1993 (SI 1993 No 3050). How are these covered?

CLP

Regulation (EC) No 1272/2008 on classification, labelling and packaging of substances and mixtures, and amending Directive 67/548/EEC and Regulation (EC) No 1907/2006 (in short CLP) is now in force and whilst you may have got a good understanding** of its requirements have you considered the possible practical implementation implications for your business?

** This workshop will not provide the understanding of the requirements that the earlier CHCS seminar (held in February and April) aimed to do – nor to provide the detail training in how to do classification and labelling that is being taught in CHCS Modules 17, 18 and 19. It is intended instead to focus on the practical implementation issues that will need to be considered, such as

- How will you control the changeover of labelling from the ‘old’ to the ‘new’ system? Will you use new SKU (stock keeping unit) numbers?
- How do you see education of the changes, and their consequences, being given to your staff and your distributors and end customers?
- How and when will you communicate the plans to you customers?

- What will you need from your suppliers, and when?
- How to control the costs
 - Will you need new labelling machines?
 - Will you be able to keep the same language groups?
- Co-ordinating the actual label changes with revision of the SDS (is it required?)

SDS

What about the changes to REACH SDSs consequent on CLP? One change in January 2009 caught several 'experts' by surprise! Other issues might be:-

- How to deal with the requirement to show both classifications on the SDS (for mixtures also for the constituents)
- How to ensure that the SDS standard doesn't deteriorate further/ is actually improved during the process
- How will you deal with the expected, but as yet fully defined, future changes to SDS provisions?

The Aim

Our aim is that you will have the opportunity to consider these issues and consider, with the help of experts and your peers, the various and varied implications and possible solutions that may be appropriate to your business.

Who should attend?

This Workshop is for all those who are concerned about the consequences, costs, and practicalities of changes of classification and labelling on industry.

It should thus be of interest to MDs, business managers, marketing and commercial managers, production managers, those responsible for product labelling, Health and Safety Managers, as well as those involved in regulatory affairs in determining the classification and labelling decision, and compiling SDS.

Workshop Format

Short presentations will be given on three aspects, followed by workshop sessions in which questions can be asked and where discussion on the practical consequences and possible solutions to various issues raised will be discussed in small working groups.

The venue facilities are being kindly provided by the National Chemical Emergency Centre (NCEC) – <http://the-ncec.com/>

Workshop Sessions

1. CHIP 4 (Desmond Waight of DanGoods)

- What changes in the new text
- What has happened to, and implications,
 - i. L142 Approved Supply List (ASL)
 - ii. L131 Approved Classification and Labelling Guide
 - iii. The SDS ACOP, etc
- Timeframe

Examples of specific issues to be covered will be:

- What has happened to some of the special statement requirements
- Whatever happened to white spirit entry
- What other changes occurred to substance entries
- Where can one get reliable C & L data on-line

2. CLP (Gill Pagliuca of Denehurst Chemical Safety Ltd)

- Getting to grips with
- Hazard Classification
- Labelling
- C & L inventory
- Guidance

Examples of specific issues to be covered will be:

- Choosing P statements
- Label design/format issues
- Practicalities and implementation

3. Safety Data Sheet (Peter Short of Safety Data Services)

- What are the changes to be dealt with in coming years
- Exposure scenarios

Examples of specific issues to be covered will be:

- Changes to Section 1 heading wording
- Providing two classification systems in SDSs
- Dealing with changes to Annex II
- Differences between REACH SDS and GHS SDS provisions

CHIP4 and CLP Workshop

From 09:15	Registration and coffee
09:45	Welcome, Safety, Welfare and Admin
09:55	Session 1 - CHIP 4 and its issues
11:25	Break
11:45	Session 2 – CLP and its issues
13:15	Lunch
14:00	Session 3 – SDS change issues
15:30	Closing comments
15:45	CLOSE (Latest)

Note Bene:

Each Session will take the form of a 30 to 45 minute presentation highlighting issues around each subject, followed by 45 to 60 minute workshop sessions for discussion on the practical implementation of the issues.

After each presentation those present will be divided into groups for discussion of the issues concerned. Arrangements have been made for at least three groups, each to be held in a separate room.

The sessions are designed to be participative, and presume some knowledge of the CHIP, CLP and REACH SDS provisions. They aim to encourage discussions about the practical issues involved.

REGISTRATION REQUEST FORM

CHIP4 and CLP Workshop

Please register the following delegate for the above Seminar at the **NCEC B329 Harwell, DIDCOT, Oxfordshire, OX11 0QJ** on **Tuesday 14th July 2009**

Title First Name Surname

Position

Company/organisation

Address

Postcode E-mail

Telephone Fax

Purchase Order Number if applicable

FEE payable (please place "x" in box as appropriate). Fees include lunch and refreshments.

£98 +VAT per person, existing CHCS member

£146 +VAT per person, new CHCS member (includes membership to 31 August 2010)

Any special requirements? No/Yes (please specify)

Signed / Name Date

To book a place, **FAX the form** to CHCS at **0844 636 2428**, or alternatively email the completed form to chcs@chcs.org.uk. A confirmation of your place will be sent on receipt of this booking form. Joining instructions and invoice will be sent separately.

Your attention is drawn to the conditions below:

Once booked, the full fee is payable. However delegates can be substituted at any time, subject to payment of membership fee, if applicable.

CHCS reserves the right to alter or cancel the programme due to circumstances beyond our control, or if numbers booking fail to reach a minimum of 24 delegates.

If CHCS cancels, then no charge will be made.
