MODULE 19 – EU CLP (GHS) LABELLING FOR SUPPLY

The supply label is the primary means by which handlers and users of products are made aware of the hazards to their health and the environment. Following on from the classification of substances and mixtures, it is imperative that products are correctly labelled.

This module will cover the new EU requirements for labelling of products such as the new label elements - symbols, signal words, hazard statements and precautionary statements. Delegates will be shown how to pull these elements together into a compliant layout. The module will also cover rules for affixing of labels, language, tactile warning devices, updating, etc.

Who should attend?

This module is mainly aimed at Safety Data Sheet writers and those responsible for ensuring that supply labelling is compliant.

It is recommended that delegates also attend Modules 17 and 18 to gain a complete understanding of CLP.

Benefits of attending

Attendance on this series of modules will ensure that **your** SDSs and labels meet the increasing expectations of both your customers and the regulators. To ensure the most effective training with optimum involvement in participative exercises, there will be a limit of 12 or 14 on the number of students depending on venue.

IOSH members are entitled to include this module in their continuing professional development records.

What you will learn

The module will include sessions covering the following topics:

- Background to the regulatory changes
- The purpose of labelling
- Hazard classes and categories
- Label elements:
 - Symbols
 - Pictograms
 - Signal words
 - Hazard statements
 - Precautionary statements
 - Supplier information
 - Other items – product identifiers, quantities, etc

- Label layout
- Label dimensions
- Affixing of labels
- Supplemental information
- Derogations
- Tactile Warning Devices and Child Resistant Fastenings
- Updating and record keeping
- Comparison between CHIP and CLP

Participants are asked to bring a copy of the Regulation (EC) No 1272/2008 on Classification, Labelling and Packaging of Substances and Mixtures, including Annexes. Electronic copies can be used. Delegates can also bring GHS if they wish.

Module Tutor

Louise Witter has been working in the field of general quality, health, safety and environment for 15 years and specializes in SDS production. She has taught SDS producing staff within all of the major production chemical companies servicing the oil and gas industry as well as general chemical majors and universities. She is also approved to instruct in the safe carriage of dangerous goods by the Civil Aviation Authority, Department for Transport and Scottish Qualifications Authority.
